Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-28 and 42-53, drawn to a method of testing a memory cell and replacing a defective memory cell with a redundant memory cell, classified in class 714, subclass 710.
 - II. Claims 29-32, drawn to a method of handling an address (in a register) associated with a memory cell that has failed a test, classified in class 714, subclass 723.
 - III. Claims 33-41, drawn to a method of checking a semiconductor die and replacing with a column of memory cells, classified in class 714, subclass 711.
2. Inventions Group I and Group II are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention Group I has separate utility such as replacing a defective cell with a redundant cell instead of replacing with a whole column of redundant cells. See MPEP § 806.05(d).
3. Inventions Group I and Group II are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed

Art Unit: 2133

does not require the particulars of the subcombination as claimed because the method of handling an address in a register of group II has novelty other than in the use of the testing of a memory cell. The subcombination has separate utility such as being used in a non-testing memory method.

4. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
